RISKS AND COMPLICATIONS OF PROCEDURE

The following is a list of possible complications in your proposed procedure. Though some complications are more rare than others, they could occur. In any human endeavor, there are many unknowns. Hence, it is impossible to have a complete list of all possible complications. If you are not satisfied with any explanation, please feel free to postpone the surgery until you believe that the potential benefit of the surgery outweighs the risks. If you would like, we encourage you to obtain a second opinion. Please discuss possible anesthesia complications with the anesthesiologist, as he/she is responsible for the delivery of the anesthesia. In cases where there is a pathologist for interpretation, it is the responsibility of the pathologist to render the diagnosis. If you have concerns or desire further explanation, please do not hesitate to ask.

Injection Snoreplasty

1. Pain and odor
2. Infection
